# Information for Victims

If you were just assaulted:

- Assure your safety – get to a place that is safe.
- If you are in immediate danger, call 911.
- Contact someone who can help you.
  - This could be the police/911, Campus Security 425.754.0154, an advocate from a Sexual Assault Center, or a trusted friend or family member.
- If possible, preserve evidence of the attack;
  - Try not to urinate, don't bathe, brush your teeth, or change or destroy your clothing; your clothes and items you may have been carrying are also evidence.
- If the assault took place in your home, do not rearrange and/or clean up anything.
- As soon as you are safe, go to a hospital Emergency Room.
  - Even if you do not think you have any medical issues as a result of the attack, it is best to have a doctor check that there are no unseen injuries, to discuss emergency contraception, etc.
  - The hospital can sometimes collect evidence up to 72 hours after an attack, although an immediate exam is most likely to gather the best evidence. Evidence collected does not have to be included in a report to the police. Crime Victims Compensation covers the cost of these exams. It is not necessary to make a police report in order to receive this medical care. You do not have to make a decision about reporting to the police at the time of the exam. The hospital can keep the evidence and you can decide later.
- As soon as you can, write down every detail that you can remember.
- And remember, what happened *is not your fault*, and *you will recover*.

Following an incident, victims are encouraged to make a report to campus security and local police, as well as the Title IX Office. This action does not obligate prosecution, but it does make legal action possible if the decision to prosecute is made later. The earlier an incident is reported, the easier it is to collect valuable evidence.
